Subject: Re: relative contribution of components to the Passaic--data from CARP

The other thing we discussed was comparing these load predictions to the results of the empirical mass balance in the FFS. Let us know what you find.

Subject relative contribution of components to the Passaic--data from CARP

Alice asked me to use the CARP matrix data to reproduce the Dioxin pie chart that PVSC presented to us, and to generate load charts for the other components. I was able to reproduce the dioxin chart and generated additional charts for the components included in the CARP response matrix -attached.
